

ATÚN SOSTENIBLE

FULL RETENTION OF TUNA POLICY

Atun Sostenible Ltd. S.A. As a company responsible for sustainability and care for the marine ecosystem, believes there is a need for global improvement.

For Atun Sostenible Ltd. S.A. tuna is the target species so fully retain and then land all the tuna caught, except when the captain determines that it was caught during the final series of the trip and there is not enough space or if it is unfit for consumption human.

Unfit for human consumption means fish that has become entangled or crushed in the seine net, is damaged due to predation by sharks or whales, or has died and spoiled in the net where a gear failure has prevented both the normal retrieval of the net and catch and efforts to release the fish alive.

Unfit for human consumption does not include fish that is considered undesirable in terms of size, marketability or species, or if it has become spoiled or contaminated as a result of an act or omission of the crew.
